UHC Medicare Advantage, Cabarrus County | For internal agent use only | 2027 benefits pending CMS approval, subject to change

AARP NC-0021 (H5253-037) — “Formerly Plan 1”

Takes the biggest hit of the three. Premium, MOOP, specialist, inpatient, and Rx deductible all rise, and dental drops \$1,000. The one bright spot: ER and urgent care copays improve.

AARP NC-15 (H5253-117) — “Formerly Plan 3”

Stays \$0 premium but gets leaner across the board — the largest Rx deductible jump of the three, and dental, vision, and OTC all cut.

Premium	\$0	\$0	Unchanged
Max Out-of-Pocket	\$4,200	\$4,450	+\$250

UHC Complete Care NC-28 C-SNP (H5253-189)

The plan that holds its value best. Still \$0 premium with a \$25 specialist copay, \$25 insulin, and \$0 diabetic supplies — and the extras actually get richer. Requires a diabetes, CHF, or cardiovascular diagnosis.

Benefit	2026	2027	Change
Premium	\$0	\$0	Unchanged
Max Out-of-Pocket	\$4,200	\$4,450	+\$250
Specialist	\$25	\$25	Unchanged
Inpatient	\$455/day, days 1–6	\$525/day, days 1–5	+\$70/day
Rx Deductible (T3–5)	\$355	\$595	+\$240
Vision	\$150 / 2 yrs	\$250 / 2 yrs	Improved
OTC / Food	\$55/month	\$70/month	Improved

Bottom Line

Across all three plans: MOOPs are up, Tier 3–5 Rx deductibles rise roughly \$240–\$245, and the \$0-premium plans shorten the inpatient copay period from days 1–6 to days 1–5. NC-0021 clients feel the most change; NC-15 clients keep the \$0 premium but lose extras; and clients who qualify for the NC-28 C-SNP come out ahead — it's the plan that held its value best going into 2027.
